

# FACT SHEET

**QUICK-clear (16 oz.) - 892438002006 - treats 947 gallons.**

- **Rapidly Clears Cloudy Water and Improves Filter Capture**
- **Phosphate Free and Will Not Affect pH**
- **Safe For Fish, Plants, and Wildlife**

## Why Use Quick-clear?

Cloudy water, also defined as water turbidity, is often caused by over-feeding, airborne dust, pond maintenance, netting out fish and water changes. Quick-clear is a quick fix for cloudiness caused by inorganic suspended particles. It binds silt, dirt, dust, debris, and excess nutrients, clumps them together and drags them to the pond bottom where they can be removed by the filter.

## When to use Quick-clear?

Anytime cloudy water occurs. Use little Green bugs: Sludge-Eaters along with Quick-Clear to remove organic debris not removed by the filter. Quick-clear does not neutralize remove nutrients in the same way as Phosphate Free.

## How to use Quick-clear?

Shake well. Add 1 capful (1 teaspoon) for every 10 gallons. Treats up to 947 gallon (3580 L).
